

# YORK REPAIR OVERVIEW

*INDUSTRIAL REPAIR SOLUTIONS THAT DECREASE YOUR DOWNTIME*

## Electric Motor Repair

This is the service we have become known for over 75 years! Whatever the industry, from Automotive to Power Generation to chemical processing, chances are you have electric motors in your process. From 3-phase motors to pump motors to servo motors, and nearly everything in-between, York can help you, quickly.

## Large Motor Repair

The premiere large motor repair center in the region. If your process has an electric motor up to 6,000HP medium voltage - we can fully rebuild and/or complete a standard recondition to keep your important motor in tip-top condition. We offer available testing up to 7200VAC and 750VDC, 20 ton lifting capacity. Our primary Large Motor customers are utilities, petrochemical, aggregate, municipalities.

## Industrial Repair

Our Industrial Repair division can perform complete, timely repairs on brakes, cylinders, Eddy Current clutch, gearboxes, magnets, pumps, fans, specialty machining repair, and other electro-mechanical related equipment. Call or ask your salesperson about any type of repair.

## Servo Motor Repair

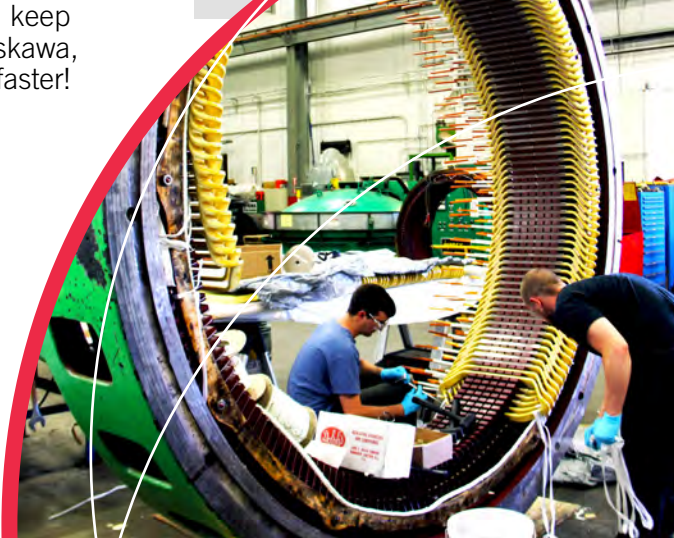

Over 11,000 servo motors repaired! We can fully repair and test your servo or spindle motors in your CNC machine or robot, return it quickly so you can keep production going! Allen Bradley, Fanuc, Modicon, Indramat, Siemens, Yaskawa, and many other brands. Our Exchange service can get you running even faster!

## Electronics Repair

Servo, spindle, VFD drives and amplifiers, power supplies, HMI monitors and touchscreens, linear scales and more. Try our fast service with repair prices much less than the OEM.

## Pump Repair

Whether it is the pump or the motor, York's Industrial pump repair can repair up to 1,000HP motor and any size pump. All types of industrial pumps such as vertical, vacuum, turbine, submersible, coolant, centrifugal. We stock pump parts and seals.
